Cyber security undergraduate at Hochschule Bonn-Rhein-Sieg with **25 merged pull requests** to 7 open-source security and infrastructure projects (69.6k GitHub stars combined), including Trivy, Prowler, pyinfra and AWS CloudFormation's cfn-lint. I build small, explainable security tools in Python, Java and C, and document each change with its tests and limits.

OPEN-SOURCE CONTRIBUTIONS

pyinfra Python infrastructure automation over SSH · ★ 6k — 10 merged · Jul 2026 – Sep 2026

- Added trust for OpenSSH host certificates signed by a known_hosts certificate authority, checking host pattern, principal and validity while keeping strict host-key checking. #1945
- Fixed sudo passwords with rsync and NFSv4 ACL handover in the SSH connector, pinned versions in the dnf operation, OpenBSD services via rcctl, and CLI argument and Windows path handling. #1950 #1955 #1913 #1916 #1892 #1884

cfn-lint AWS CloudFormation linter · ★ 2.6k — 8 merged · Jul 2026 – Sep 2026

- Rejected a bare Fn::Select used as a CreationPolicy or UpdatePolicy without AWS::LanguageExtensions, validated at the policy layer so the shared resolver stays unchanged. #4704
- Corrected intrinsic-function and schema validation for Fn::GetAZs in Fn::Join, negative Fn::Select indexes, FindInMap DefaultValue, SAM GetAtt outputs and single-property schemas. #4677 #4622 #4628 #4665 #4686

Prowler Cloud security posture scanner · ★ 15k — 3 merged · Jul 2026 – Sep 2026

- Added a Kubernetes check for Pods mounting hostPath volumes, including the volume data in the service model. #11837
- Stopped seven ECS task-definition checks from reporting PASS when DescribeTaskDefinition failed, and reported Google Workspace 2-Step Verification failures that group overrides do not cover. #12217 #12700

Further merged work — 4 merged · Jul 2026 – Sep 2026

- **Trivy** ★ 38.3k: Read Jenkins plugin licenses from MANIFEST.MF as a JAR license source. #10939
- **ansible-lint** ★ 3.9k: Checked register projection keys instead of the whole mapping in var-naming. #5110
- **GuardDog** ★ 1.2k: Linked findings to PyPI Inspector, with terminal-escape checks on package-controlled URLs. #797
- **Graphtage** ★ 2.5k: Added INI files to the semantic diff using the standard library parser. #120

PROJECTS

cloudtrail-quickscan Python
Explainable first-pass triage of AWS CloudTrail logs: root activity, MFA removal, administrator policies, permissions-boundary removal, logging changes, S3 exposure and public SSH/RDP ingress, with text or JSON reports.

jsonl-lens Python
Report for messy JSON Lines exports: missing versus null fields, type drift, nested paths and high-cardinality identifiers.

StudyPulse TypeScript · React · Cloudflare Workers · D1
Study planner with a topic memory model and recall checks; model judgement is bounded and scores and rewards are computed deterministically on the server.

socket-state-triage C
Dependency-free review of Linux socket listings that highlights wildcard listeners and broad privileged-port binds.

EDUCATION

Hochschule Bonn-Rhein-Sieg (H-BRS) Germany
Oct 2025 – present
B.Sc. Cyber Security & Privacy
Java, Linux, networking protocols, SQL databases, mathematics and Technische Informatik; GDPR and privacy by design.

Harvard University, CS50x Online course
2024
Algorithms, data structures, C, Python, SQL and web development; independent final project.

FHM University of Applied Sciences Bielefeld, Germany
Dec 2024 – Jun 2025
University preparation and Feststellungsprüfung (FSP)
Certified German C1 within the same six months.

Xiamen Jimei Middle School Xiamen, China
Sep 2021 – Jun 2024
High school diploma, science track; Gaokao.
